13.d. Rehabilitative services. (continued)

- Effective January 1, 2002, provider travel time is covered if a recipient's individual treatment plan requires the provision of mental health services outside of the provider's normal place of business. This does not include travel time included in other billable services.
- Payment for **outpatient chemical abuse programs services** is pursuant to county-negotiated rates.
- Payment for **EPSDT services identified in IFSPs/IEPs** under the Individuals with Disabilities Education Act (IDEA) and provided by school districts to children with IFSPs/IEPs during the school day is pursuant to a cost-based, per child encounter rate.

**INTERIM RATE METHODOLOGY FROM JULY 1, 2000 THROUGH JUNE 30, 2002**

From July 1, 2000, through June 30, 2002, interim rates will be developed for each school district, for each provider type within that school district. The rates will be based upon a two-month survey of school-based providers of IFSP/IEP services and audited cost data (salary plus fringe benefits).

A child count will be collected from each IFSP/IEP provider. The child count includes the number of children served by each provider type participating in that school district.

*Interim Rate Formula:* Cost per school district, per provider type, divided by the child count for that provider type.

**INTERIM RATE METHODOLOGY EFFECTIVE JULY 1, 2002**

School districts are paid interim rates using cost-based, per child encounter rates using data collected during the previous year.

*Interim Rate Formula:* The interim rate formula is the same as the final rate formula effective July 1, 2000. The rate will be reviewed and updated annually, using the most current available data.

13.d. Rehabilitative services. (continued)

**FINAL RATE METHODOLOGY EFFECTIVE JULY 1, 2000**

At the end of the interim rate year, the Department will settle up with school districts using actual data reported for the payment year.

*Final Rate Formula:* The final rate is derived by dividing salaries plus fringe benefits by total employment hours. This result is multiplied by medical assistance direct service hours, then divided by medical assistance encounters.
